The Ace Training and Development Centre approach to Ubiquiti courses will dramatically improve your skills and further develop your career prospects.

Course Overview

Become an Ubiquiti Enterprise Wireless Admin (UEWA) at the Ubiquiti Training Academy brought to you by [Ace Training and Development Centre](#). Gain valuable training with hands-on course material, up-to-date training, and foundational knowledge. See and use specialty training equipment and gain expert knowledge that will enable you to use, sell, and install/configure Enterprise WLAN equipment and build out cost effective indoor and outdoor Wireless LANs using Ubiquiti UniFi equipment.

Course includes two days of first-hand knowledge and the ability to become a fully certified Ubiquiti UniFi Administrator. Those who complete course, lab and pass an examination will receive full certification and the right to bear the “UEWA” emblem on their website and use associated marketing materials.

Course Description and Outline (UEWA)

This course is formerly known as the Ubiquiti UniFi Certified Admin (UUCA) course. The UEWA course provides technical training that addresses the flexibility of UniFi as a managed wireless solution, including tailoring to specific applications or installs. Helping professionals to avoid common issues and learning the fine details of the UniFi controller's functionality. This course will greatly decrease installation time and allow you to get the most out of the UniFi platform to suit your business model.

The course includes two days of hands-on training and offers the ability to become a fully certified Ubiquiti Enterprise Wireless Admin (UEWA), upon passing the examination at the end of the course.

Course Outline

- **Overview of Enterprise Networks**
- **RF and Antenna Fundamentals**
- **WLAN Fundamentals**
- **WLAN Planning**
- **Comprehensive UniFi Configuration**
- **Advanced Adoption Techniques**
- **Guest Portal & Hotspot Integration**
- **WLAN Troubleshooting**
